

Collect and Sort Data

Collect data from everyday activities and sort it into groups — start with toys, making one group for things that move and one for things that don't, then talk about your groups.

Collect

Gather the toys you will sort into groups.

Sort

Make two groups — move and don't move.

Talk

Say why each toy belongs in its group.

Sorting toys into two groups.

Toys that move

Toys that don't move

Modelling routine

1 I do

Sort a car into “move” and say why it belongs there.

2 We do

Sort a book and a ball together — which group for each?

3 You do

Children collect toys and sort them into the two groups.
