

Answer a Yes / No Question

Decide how to organise data to answer a Yes/No question — do more people have shoes with laces than without? Line the shoes up and match them one-to-one to find out.

Ask

Ask a question with a yes or no answer.

Line up

Line the two groups up and match one-to-one.

Answer

Compare the rows to answer the question.

Matching shoes one-to-one to compare.

Laces

No laces

more laces

Modelling routine

1 I do

Ask “do more shoes have laces?” and line up two rows.

2 We do

Match each laced shoe to one without — which is left over?

3 You do

Children match one-to-one and answer the question.
