

School Days & Weekends

Sort the seven days into school days and weekend days — then show the week is a loop that repeats, with Monday always following on from Sunday.

School week

Monday to Friday are the days we come to school.

Weekend

Saturday and Sunday are the weekend — rest days at home.

It repeats

After Sunday comes Monday again — the week goes round.

Five school days, then two weekend days.

The week repeats — after Sunday, Monday starts again.
