

Collect the Right Quantity

Give a spoken number word or show a numeral, then have students count out that many objects from a collection.

“nine”

Hear the word

Say a number word aloud. Students collect that many objects from the tray.

7

Read the numeral

Show a numeral card. Students read it and select that many objects.

Worked example

Hear “nine”, then collect 9 brushes from a tray of 12.

Look for

One-to-one counting, stopping at the right number, and self-checking by recounting the collection.
