

# Which Takes Longer?

Start two events at the same time and watch which one is still going – that one takes longer. Describe it with words like quick, slow, longer and shorter.

## Start together

Begin both jobs at the very same moment.

## Watch the end

The one still going when the other finishes takes longer.

## Say how

"It took longer because I'm still learning."

**Start both at the same time – which is still going at the end?**

"The buckles took longer – I'm still learning to do them up."

## Modelling routine

### 1 I do

Say "ready, set, go" and start two jobs at once.

### 2 We do

Watch which job is still going when the other is done.

### 3 You do

Children compare two events and say which took longer.
