

Where Is the Robot?

Describe where a robotic toy is as it moves around a familiar space — for example, the robot car is under the desk or next to the chair.

Watch

Follow the robot as it moves.

Name

Say where it is — under, next to, in front of.

Track

Describe each new position as it moves.

Where the robot can be.

Under
the desk

Next to
the chair

In front of
the box

Modelling routine

1 I do

Drive the robot and say “it is under the desk”.

2 We do

Move the robot and describe each position together.

3 You do

Children drive the robot and describe where it is.
