

Repeating Patterns on Screen

Recognise and discuss repeating patterns in images made with geometry software or a generative AI tool, then describe what has been repeated.

Notice

Find the tile that repeats across a computer-made pattern.

Discuss

Talk about what stays the same and what changes each time.

Describe

Say what has been repeated – “a blue triangle, then a red dot”.

Look at the generated pattern – what has been repeated?

“a blue triangle, then a red dot – repeated across the row”

Modelling routine

1

I do

Point to the tile that repeats and name its shape and colour.

2

We do

Discuss what stays the same and what changes each time.

3

You do

Students describe another screen pattern in their own words.
