

Patterns That Help at Home

Show how recognising a repeating pattern in an everyday task – like setting the table – makes the job quicker and easier.

Notice

Find the part that repeats in an everyday routine, like a place setting.

Use

Follow the pattern to finish the task faster and get every step right.

Explain

Talk about how spotting the pattern made the job easier.

Set the table – every seat repeats the same place setting

“plate, fork, spoon ... plate, fork, spoon for every seat”

Modelling routine

1 I do

Set one place, naming plate, fork, spoon as the repeating unit.

2 We do

Set the next place together using the same pattern.

3 You do

Students finish the table and check every place matches.
