

Order the Numbers

Write missing numbers, put groups in order from least to greatest, and find the number before and after.

Fill the number line

Before and after

Which number comes just before 4? And just after 4?
Practise with 2 and 5 as well — say the count aloud each time.

Least to greatest

Put 3, 0, 5, 1, 2, 4 in order.
Start with the smallest number and build all the way up to 5.
