

Sort the Model Animals

Sort a collection of model animals into groups and explain your strategy — you might group by legs, by wings, or by where they live.

Choose a rule

Pick one feature to sort by.

Sort

Put the animals into groups.

Explain

Say how you grouped them.

One way to sort — animals with and without wings.

Has wings

No wings

Modelling routine

1 I do

Sort by wings and say "these all have wings".

2 We do

Try a new rule — sort the same animals by legs.

3 You do

Children choose a rule, sort, and explain how.
