

Science Understanding

Science Understanding is what we know about the world. We look closely at living things, materials, the sky and the way things move.

In this strand

Biological

Look at living things
and their features

Chemical

Explore materials
and what they are
like

Earth & sky

Notice the sky,
weather and daily
changes

Physical

See how things move
with a push or pull

Big idea

We observe, describe and explain the world around us.

Words we will use

observe

describe

living

material

weather

push

pull

change
