

Chemical Sciences

Chemical Sciences is about materials. Everything around us is made of materials like wood, metal, plastic and glass, and each one has properties we can see and feel.

In this strand

Materials

Name wood, metal, plastic and glass

Observe

Look closely at what things are made of

Properties

Notice hard, soft, shiny and rough

Sort

Group materials that are alike

Big idea

Objects are made of materials, and each material has properties we can observe.

Words we will use

wood

metal

plastic

glass

hard

soft

shiny

rough

bendy
