

Evaluating

We think about what we predicted, compare it with what we observed, and decide if they matched.

In this strand

Predict

We say what we think will happen first.

Observe

We watch and notice what really happens.

Compare

We look at our prediction and observation together.

Decide

We decide if they are the same or different.

Big idea

We compare what we predicted with what we observed to see if they matched.

Words we will use

predict

observe

compare

match

same

different
