

Physical Sciences

Physical Sciences is about how things move. We push and pull objects and watch the way they roll, slide, bounce and spin.

In this strand

Move

Watch things roll, slide, bounce and spin

Size

See how big and small things move

Shape

Notice how round and flat shapes move

Material

Feel how hard and soft things move

Big idea

We describe how things move and what makes them move that way.

Words we will use

push

pull

roll

slide

bounce

spin

fast

slow

stop
