

# Shapes Down a Slope

Roll differently shaped objects — blocks, tubes and eggs — down a slope and describe how each one moves. Round things roll, flat things slide and eggs wobble.

## Set up

Make a slope and choose an object.

## Roll

Let the object go down the slope.

## Describe

Say if it rolled, slid or wobbled.

Different shapes move in different ways.

block

tube

egg

## Modelling routine

### 1 I do

Roll a tube and say "it rolls straight".

### 2 We do

Send a block and an egg down the slope.

### 3 You do

Children roll shapes and describe each move.
