

Observe with Our Senses

We use touch, smell, sight and hearing to make observations. We never use taste to observe in science.

See and hear

Use eyes to look and ears to listen.

Touch and smell

Use hands to feel and a nose to smell.

Not taste

We do not taste things in science.

Senses we use to observe

See

Hear

Touch

Smell

Modelling routine

1

I do

Name each sense and show how it helps us observe.

2

We do

Observe one object using each safe sense together.

3

You do

Children observe with their senses, not taste.
