

Observing Country

First Nations Australians have looked at the land, sky, water and living things for a very long time. This helps them find food and water and know when the weather changes.

Land

Look at plants, animals and the land.

Water

Notice where water can be found.

Weather

Watch for changes in the weather.

What we can see on Country

Land

Water

Food

Weather

Modelling routine

1

I do

Show a weather change I have seen.

2

We do

Notice living things outside together.

3

You do

Children look and share what they see.
