

Share questions, predictions, observations and ideas with others

share questions, predictions, observations and ideas with others

Learning intention

- share questions, predictions, observations and ideas with others

Teach and model

- sharing questions, making predictions and describing observations to others through discussions and circle groups
- recounting stories and posing questions about their own experiences learning about the natural world, such as when gardening or observing plants and animals at home or...
- showing or describing how objects can be moved in different ways and responding to questions

Check understanding

- Explain the main idea in share questions, predictions, observations and ideas with others using an example.
- Show the idea in a second way: with words, a model, a diagram or symbols.
- Apply the idea to a short unfamiliar situation and justify the result.

Teaching cautions

- Ask the student to explain their choice, not only state an answer.
- Check that key vocabulary is understood in a new example.
- Mix representations so the skill is transferred rather than copied.

Quick lesson sequence

- Connect to prior knowledge and introduce the key vocabulary.
- Model one clear example, then solve a second example together.
- Finish with an independent check and a short student explanation.
