

Words That Mean the Same

Elaboration 1 · Double, twice, times 2, halve, divide by 2

ELABORATION FOCUS

Relating double, twice and multiply by 2, and halve and divide by 2, using hundreds charts and materials to find related facts.

LEARNING INTENTION I can match words that mean the same thing.

Double

Twice

Times 2

Halve

Share by 2

1

Say It Three Ways

Step 1: double 8. Step 2: say twice 8 and 8×2 mean the same thing.

2

Colour the Chart

Step 3: colour every double on a hundreds chart. Step 4: read the pattern 2, 4, 6, 8.

3

Flip the Fact

Step 5: for 8 twos, think 2 eights. Step 6: use a coloured square to find the half.

MODEL · THREE WAYS TO SAY THE SAME THING

Different words, same picture, same answer — and halving takes you back.

For 8 twos, think 2 eights — and half of 16 takes you back to 8.

Double 8, twice 8 and 8×2 all give 16, and half of 16 takes you back to 8.

TEACHER MODELLING ROUTINE I do → We do → You do

WATCH FOR

Thinking double and halve are different topics instead of one idea both ways.

REMEMBER

Say it to students as: "Double, twice and times 2 are three names for one job."

MATERIALS

Hundreds charts, coloured pencils, mirrors, cubes, digital hundreds chart tools.
