

# Skillr Education — Year 1 Science Sampler

## Sorting Materials

Sorting materials by colour, hardness, texture and flexibility.

Name: \_\_\_\_\_ Date: \_\_\_\_\_

### Practice

|                                                                                     |
|-------------------------------------------------------------------------------------|
| 1. Circle a property used to sort materials: colour / loudness / hardness / texture |
| 2. Sort into hard and soft: rock, sponge, wood, cotton wool.                        |
| 3. Which property means how much something bends? _____                             |
| 4. Circle the flexible material: glass / rubber band / brick                        |
| 5. Choose a property and sort pencil case items. My property is: _____.             |
