

Practice: Collecting & Recording Data

Read the tally marks and answer. Remember: five marks = four lines and one across.

Name: _____

Date: _____

Worked Example

|||| shows a group of 5. |||| || shows $5 + 3 = 8$. Count each group of five, then the extra marks.

Q1. How many marks are in one full tally group?

Q2. How many tally marks do you make for each answer?

Q3. |||| || shows how many? (5 and 2 more)

Q4. Count by fives: |||| |||| = ?

Q5. Write a question you could collect data about.

Q6. |||| |||| || shows how many?
5, 5 and 3

Q7. Is a tally mark a good way to count answers?

yes / no

Q8. Why do we ask each person only once?

Explain.
