

Star Charts & Symbols

AC9M1ST01_E4 Using star charts with stickers or symbols to represent class data, such as symbols on a feelings chart or activities on a class calendar.

Learning Intention: I can use stars, stickers or symbols to stand for data.

1. One Symbol

Pick a symbol to use.

a star, a sticker, a face
each one stands for a value.

2. Add Each Day

Place a symbol for each.

a star each time it happens
line them up in a row.

3. Read It

Count the symbols.

more stars means more
compare the rows.

💡 Model It

A star for each sunny day: this week has 3 stars. Last week had 5 stars. Last week had more sunny days.

Let's Talk

What will one star stand for?

How many stars did we add?

More or fewer?

Which row has the most stars?

For Teachers & Parents

Choose one symbol:

a star, sticker or feeling face.

Add one per event or day:

keep them in a straight row.

Count and compare the rows.
