

Practice: Yes / No Questions

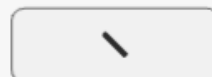

Use the yes/no data to answer the questions.

Name: _____

Date: _____

 Worked Example

'Do you like apples?' Yes = 6, No = 3. More said yes because 6 is greater than 3. In all, $6 + 3 = 9$ people.

X

Q1. How many answers does a yes/no question have?

Q2. Yes = 6, No = 3. Which group is bigger?

Q3. How many people answered in all? ($6 + 3$)

Q4. Is 'What is your favourite colour?' a yes/no question?

yes / no

Q5. Write a yes/no question you could ask.

Q6. Yes = 4, No = 4. Which group is bigger?

Q7. How many marks do you make for each answer?

Q8. Why do we keep yes and no in separate groups?

Explain.
