

Practice: Comparing Capacity

Pour to compare how much each container holds. Order from least to most.

Name: _____ Date: _____

Worked Example

Pour the cup into the jug — it does not fill it, so the jug holds more. Order: cup, bottle, jug.

Q1. Which holds more: a cup or a bucket?

holds more = _____

Q2. Order least to most: bucket, spoon, cup.

Q3. Which holds the least: a spoon or a jug?

least = _____

Q4. A bottle fills 2 cups, a jug fills 4 cups. Which holds more?

Q5. Fill: holds the most, in between, holds the ____.

Q6. Pour a full cup into a bowl; space is left. Which holds more?

Q7. Jars fill 3, 1, 2 cups. Order least to most.

Q8. How do you know the bucket holds the most?
Explain.
