

Number Cards 1 - 20: Cut & Order

AC9M1N01 Read, show and put numbers up to 120 in order, using blocks, number cards, number lines and charts.

Learning Intention: We can make number cards and put numbers in order, lowest to highest and highest to lowest.

Print, Cut & Order

- Print this page and cut along the dashed lines to make 20 number cards.
- Put the cards in order, lowest to highest (1 to 20).
- Then order them highest to lowest (20 to 1).
- Shuffle the cards, lay them out randomly, and sort again.

Extend and Play - to 100

- Hand-write extra cards for 21 to 100 on paper and add them in.
- Mix all the cards and deal out a small handful to put in order.
- Take one card from a row and ask: which number is missing?
- Time it - how fast can you order a shuffled set?
