

Describe the Shape by Feel

AC9M1SP01_E2 Selecting a shape from a collection inside a bag and describing it by feel, so others can name the shape, giving reasons for their choice.

Learning Intention: I can feel a hidden shape and describe it so others can name it.

1. Feel It

Reach into the bag.
don't look — just feel.
Feel the sides and corners.

2. Describe It

Use shape words.
'It has 3 straight sides.'
'It is round with no corners.'

3. Name & Reason

Others guess the shape.
then give your reason
'I felt 4 equal sides.'

💡 Model It

I feel 3 straight sides and 3 corners. It must be a triangle, because a triangle has 3 sides and 3 corners.

Let's Talk

How many corners can you feel?
Are the sides straight or round?
What shape is it?
How do you know from feeling?

For Teachers & Parents

Use a feely bag:
put a few shapes inside.
Describe, don't peek:
talk about sides and corners.
Ask the child to justify each guess.
