

Practice: Describe by Feel

Use feeling words about sides and corners. Name each shape and give a reason.

Name: _____

Date: _____

 Worked Example

I feel 3 straight sides and 3 corners — it is a triangle, because a triangle has 3 sides and 3 corners.

Q1. A shape with no corners and a round edge is a ____.

Q2. You feel 4 equal straight sides. Which shape?

Q3. How many corners does a triangle have?

_____ corners

Q4. Straight sides or round: which does a circle have?

Q5. You feel 3 sides and 3 corners. Which shape?

Q6. Name one thing you can feel on a shape.
side / corner

Q7. A rectangle has how many corners?

_____ corners

Q8. Why can you tell a circle just by feeling it?
Explain.
