

Biological Sciences

Discovering living things — what they are, what they need, and where they live.

Australian Curriculum v9.0 • Year 1

What we'll explore

1 Living and non-living

Sort the things around us into living and non-living groups.

2 External features of animals

Name the body parts animals use to move, eat and sense the world.

3 External features of plants

Explore roots, stems, leaves and flowers and what each part does.

4 What living things need

Food, water, air and space keep living things healthy.

5 Where living things live

Match plants and animals to the places they call home.
