

Everyday and Science Words

Name: _____

Date: _____

WORKED EXAMPLE

We explore the difference between everyday words and scientific words when describing objects or events. Both kinds of words can help us explain what we notice.

Q1

Circle science words: force, observe, thingy, predict.

Q2

Tick one: 'Force' is a science word [] or an everyday word [].

Q3

Fill the gap: A science word for a big look is to _____.

Q4

Match: push, look, guess -- observe, force, predict.

Q5

Draw an object. Write one everyday word and one science word for it.

Q6

Teach a family member one science word. Tell your class the word.

Q7 CHALLENGE

Write an everyday word and a science word for the same idea.
Everyday: _____ Science: _____
