

Making and Recording Observations

Watch, measure and record

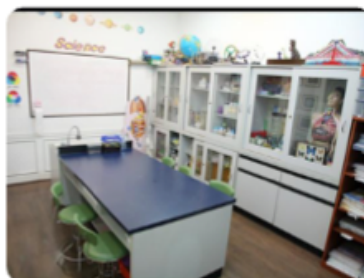

Use our senses

We look, listen, smell and touch safely.

Measure it

We use cups, blocks or paces to measure.

Use digital tools

A camera or tablet can record what we see.

Write it down

We draw, count or note our observations.

TEACHER TALK - OBSERVE AND RECORD

Explain that an observation is what we notice with our senses. Model recording observations by drawing, counting, and taking a photo.
