

Physical Sciences

Exploring how things move — the pushes and pulls that make objects go, stop and change shape.

Australian Curriculum v9.0 • Year 1

What we'll explore

1 Pushes and pulls

Every move begins with a push or a pull.

2 How things move

Objects can roll, slide, spin, bounce and slow down.

3 Size and shape

An object's size and shape change how it moves.

4 Changing shape

A push or a pull can bend, stretch or squash things.

5 Fast, slow and stop

We can make things speed up, slow down or stop.
