

Daily & Seasonal Changes

How each day and season changes the world around us

Day and night

The night sky

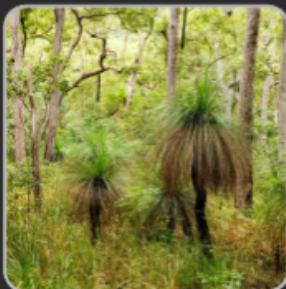

Changing weather

The seasons

CAN YOU SPOT?

Is it day or night? Which season might it be, and how would it change what we wear and do?

TEACHER GUIDE **Big idea:** The world around us changes daily — from morning to midday to night — and across the seasons as the weather turns warmer or cooler. These changes shape what we wear, what we do and how plants and animals live.

Ask: What changes from day to night? How do summer and winter feel different? How do these changes change what we wear, eat and do?
