

Different Ways to Investigate

Name: _____

Date: _____

WORKED EXAMPLE

There are different ways to investigate science questions. We can observe, test, sort, or ask and talk about it. We explore these ways through guided discussion.

Q1

Circle ways to investigate: look closely, test it, sort it, close your eyes.

Q2

Tick one: There is often more than one way to investigate [] or only one way [].

Q3

Fill the gap: We can _____ something and watch what happens.

Q4

Match: observe, test, sort -- group, try, look.

Q5

Draw yourself investigating. Show which way you chose.

Q6

Investigate a small question at home. Tell your class the way you used.

Q7 CHALLENGE

Write one way you could investigate a question you have.
I could: _____
