

Sorting Data and Finding Patterns

Name: _____

Date: _____

WORKED EXAMPLE

We sort and order data and information, and show patterns using tables and visual or physical models. Sorting helps us see what is the same and what is different.

Q1

Circle ways to show data: a table, a picture graph, a model, a nap.

Q2

Tick one: Sorting helps us see patterns [] or hide them [].

Q3

Fill the gap: We can put data into a _____ to organise it.

Q4

Match: sort, order, show -- table, groups, line up.

Q5

Draw two groups of objects. Label what makes each group the same.

Q6

Sort your toys into groups at home. Tell your class your groups.

Q7 CHALLENGE

Sort some objects into two groups. Write the name of each group.

Group 1: _____ Group 2: _____
