

Caring for Local Nature

Name: _____

Date: _____

WORKED EXAMPLE

Native animals need food, water and shelter. We can change our gardens and parks to help them by planting local plants, adding water, and keeping the space clean and safe.

Q1

Circle what helps native animals: local plants, litter, clean water, loud noise.

Q2

Tick one: A bird bath gives animals a place to drink water [] or a place to hide from rain [].

Q3

Fill the gap: We plant _____ plants to give native animals food and shelter.

Q4

Draw a line: bird, frog, bee -- pond, flowers, tree branch.

Q5

Draw a park that helps native animals. Label the food, water and shelter you added.

Q6

Visit a local park or garden. Find one thing that helps an animal and one thing we could add. Tell your class.

Q7 CHALLENGE

Think of a garden or park near you. Write one change that would help a native animal live there.

My idea: _____
