

Learning from Plant Experts

Name: _____

Date: _____

WORKED EXAMPLE

Farmers, gardeners, nursery owners and bush care volunteers observe what plants need. Then they design or manage a habitat — the right soil, water, light and space — to help plants grow.

Q1

Circle who helps plants grow: a farmer, a gardener, a nursery owner, a race-car driver.

Q2

Match the expert to the job: farmer, gardener, nursery owner — grows crops, cares for a garden, raises young plants.

Q3

Fill the gap: A gardener _____ a plant closely to see what it needs.

Q4

Fill the gap: A bush care volunteer plants natives to make a _____ for living things.

Q5

Draw a plant and label one thing it needs to grow well.

Q6

Ask someone who grows plants what they watch for. Write one thing they do to help a plant grow.

Q7 CHALLENGE

Look closely at a real plant. Write one thing it needs, then design a good spot for it to grow.
My plant needs: _____
