

First Nations Science: Meeting Needs

Name: _____

Date: _____

WORKED EXAMPLE

First Nations Australians use careful observation and knowledge shared over many years to meet their needs - finding food and water, and making shelter from local materials.

Q1

Circle three needs people must meet: food, water, television, shelter.

Q2

Tick one: Shelter keeps us safe from the weather [] or helps us run fast [].

Q3

Fill the gap: We can look closely at the _____ to help us find water.

Q4

Match: food, water, shelter -- a cave, a river, a fruit.

Q5

Draw a shelter made from things you might find outdoors. Label one material.

Q6

Ask at home: where does our water come from? Draw or write one thing you learned.

Q7 CHALLENGE

Choose one need -- food, water or shelter. Write one way people can meet it using knowledge of the land.
One way: _____
