

Learning from Plant Experts

People who observe what plants need

Farmers

Watch their crops and give them water, light and food.

Bush care volunteers

Plant natives and care for local habitats.

Gardeners

Notice when plants need water, sun or shade.

Nursery owners

Grow young plants in the right soil and light.

TEACHER TALK • OBSERVE, THEN DESIGN

Ask: how do experts find out what a plant needs? They observe it closely, then design or manage a habitat that gives it water, light and space.
