

Caring for Local Nature

Ways we care for our local nature

Watch and learn

Notice which animals visit our garden or park and what they need.

Plant natives

Local plants give food and shelter to native animals.

Add water

A shallow bird bath or pond helps animals drink safely.

Keep it safe

Pick up litter and keep pets away from wildlife.

TEACHER TALK - CARE FOR OUR PLACE

Ask: which animals live near our school? Walk the garden and name one change that would help them find food, water or shelter.
