

# Science as a human endeavour

Explore how people use science to care for living things every day

**PLANTS**  
Water & light

**ANIMALS**  
Feed & shelter

**WEATHER**  
Watch the sky

**RECYCLE**  
Sort & reuse

## INVESTIGATE IT YOURSELF

Look for science in your own day. Water a plant, feed a pet, or watch the clouds. Notice a pattern and use it to predict what will happen next.

**TEACHER GUIDE** **Big idea:** People use science every day to care for living things and their world — watering plants, feeding animals, reading the weather, and recycling. When we notice patterns, like grey clouds before rain, we can predict what happens next and plan what to do.

**Ask:** Where did you use science today? What pattern did you notice, and what did it help you predict?
