

Science in Our Daily Lives

Name: _____

Date: _____

WORKED EXAMPLE

People use science every day. We water plants and give them light, feed and shelter animals, watch the weather for patterns, and sort paper and bottles to recycle. When we notice a pattern, like grey clouds before rain, we can predict what happens next.

Q1

Circle the ways we use science every day: watering plants, feeding pets, reading the weather, dropping litter.

Q2

A gardener waters a plant to help it grow. Tick one: yes ☐ no ☐

Q3

Draw a line to match: plant, pet, weather — water it, feed it, predict the day.

Q4

Fill the gap: Grey clouds often come before _____.

Q5

Fill the gap: We _____ paper and bottles to care for our world.

Q6

A farmer watches the sky, then _____ what the weather will do.

Q7

Draw one way you care for a living thing at home. Label what you do.

Q8 CHALLENGE

Watch today’s weather with someone at home. Predict tomorrow, then check if you were right.
