

Science at Home Every Day

Ways we use science at home

Check the forecast

Watching or listening to the weather to plan our day.

Watch the sky

Clouds and wind can tell us if rain is coming.

Dress for the season

We wear warm or cool clothes to suit the weather.

Plan outings

We pick good days for the park, beach or sport.

TEACHER TALK - EVERYDAY SCIENCE

Ask: how did you decide what to wear today? Show that watching weather patterns and forecasts is science we use to plan events and stay comfortable.
