

Learning from Wildlife Carers

Homes we can build for animals

Nesting boxes

Safe boxes give birds and possums a place to rest.

Frog hotels

Cool, damp hideouts help frogs shelter.

Insect hotels

Stacked twigs and tubes give insects a home.

Recycled habitat

Reusing materials makes new shelters for wildlife.

TEACHER TALK - OBSERVE, THEN DESIGN

Explain that ecologists and wildlife carers observe how animals behave, then design supports like nesting boxes and frog hotels to meet their needs. If you can, invite a local carer to visit.
