

Predicting What We'll Find

Name: _____

Date: _____

WORKED EXAMPLE

We make predictions about the types of plants and animals we might see in a place, such as a garden or a pond. Then we visit and check what we really find.

Q1

Circle what lives at a pond: frog, fish, camel, duck.

Q2

Tick one: A garden is a good place to find bees [] or whales [].

Q3

Fill the gap: We use _____ like wet or sunny to help us predict.

Q4

Match: pond, garden, tree -- bird, frog, bee.

Q5

Draw a pond or garden. Show two things you predict live there.

Q6

Look in a garden at home. Tell your class if your prediction was right.

Q7 CHALLENGE

Pick a place. Write one animal or plant you predict you will find.

I predict I will see: _____
