

Predicting What We'll Find

Guessing what lives here

At a pond

We predict we might see frogs, fish or ducks.

In a garden

We predict bees, worms and flowers.

Use clues

Wet or dry, sunny or shady, gives us hints.

Check by looking

We visit and see if our guess was right.

TEACHER TALK - PREDICT THEN OBSERVE

Before visiting a garden or pond, ask children to predict which plants and animals they might find. Then observe and compare.
