

Predicting Seasonal Changes

Name: _____

Date: _____

WORKED EXAMPLE

We make predictions about patterns we can observe, such as seasonal changes in plants or changes in temperature across the seasons. Patterns help us guess what will happen next.

Q1

Circle seasonal changes: leaves fall, it gets cooler, the moon is cheese, flowers bloom.

Q2

Tick one: Summer is usually warm [] or cold [].

Q3

Fill the gap: A _____ helps us predict what comes next.

Q4

Match: summer, winter, autumn -- cool, warm, falling leaves.

Q5

Draw the same tree in two seasons. Show how it changes.

Q6

Notice the weather for two days. Predict tomorrow and check.

Q7 CHALLENGE

Write one change you predict will happen as the season changes.

I predict: _____
